CUSTOMERIQ — EXECUTIVE INTELLIGENCE REPORT

Autonomous Machine Learning, Behavioral Diagnostics & Strategic Decision Support

Report Date:	October 26, 2026	**Observation Horizon:**	2014-01-03 to 2017-12-30
Active Accounts:	793 Verified Accounts	**Prediction Horizon:**	12 Months Forward
Model Architecture:	Gradient Boosting Regressor (Ensemble Trees) (v1.0)	**Validation Metrics:**	MAE $965.44 | 80% CI Bounds

HISTORICAL REVENUE	PROJECTED 12M LTV	HISTORICAL PROFIT	DORMANT ACCOUNTS
$2,297,201	**$889,748**	**$286,397 (12.5%)**	**202 (25.5%)**

1. Portfolio Segmentation & Behavioral Distribution

Customer accounts are segmented using rule-based RFM (Recency, Frequency, Monetary) quintiles. The table below details account counts, cumulative sales, and predicted 12-month forward value by tier.

Segment	Accounts	Historical Revenue	Avg AOV	Mean Recency	Projected 12M LTV
Loyal Customers	160	$577,000	$492	50d	$194,320
Champions	105	$555,843	$583	24d	$100,313
Need Attention	100	$340,710	$449	151d	$96,254
Promising	81	$222,643	$630	60d	$112,079
About to Sleep	54	$195,051	$833	356d	$86,282
At Risk	31	$137,015	$579	383d	$29,419
Dormant / Lost	76	$79,532	$224	165d	$80,422
Potential Loyalists	67	$74,568	$178	25d	$74,177
Hibernating	80	$59,430	$247	496d	$69,005
New Customers	39	$55,408	$447	25d	$47,477

2. Strategic Marketing Action Plan (Opportunity Center)

Under a prioritized $5,000 budget allocation, CustomerIQ identifies **330 accounts** for high-conviction intervention, unlocking an estimated **$63,557.05** in retained value (projected portfolio ROI of **11.72x** vs 2.37x on blanket campaigns).

Intervention Action	Target Accounts	Unit Cost	Assumed Lift	Strategic Rationale
Executive VIP Concierge & Personalized Gifting	8	$65	12%	High-touch personal outreach with bespoke enterprise gifting and dedicated account management.
Targeted Reactivation Campaign & Margin-Safe Voucher	93	$25	18%	Time-sensitive 10% voucher with personalized category recommendations based on prior purchases.
2nd-Purchase Fast-Track Automation	0	$8	22%	Automated product education sequence with complimentary accessory credit upon second order.

Cross-Category Expansion Trigger	144	$12	14%	Data-driven recommendations for unpurchased categories (e.g., Technology accessories for Office buyers).
Account Profitability Restructuring	85	$5	5%	Removal of unapproved discounts and transition to net-margin pricing agreements.

3. Early-Warning & Behavioral Anomaly Alerts

Automated diagnostic monitoring identified **360 behavioral alerts** (42 Critical, 273 Warning, 39 Opportunity). Below are the highest-urgency critical accounts requiring immediate intervention:

Account / ID	Severity	Detection Diagnostic	Recommended Next Step
Alejandro Grove AG-10270	**CRITICAL**	Customer generated $2,582.90 over 5 orders, but has been inactive for 278 days (last order: 2017-03-27).	Verify if account contact has changed; review recent support tickets; launch re-activation offer.
Anna Häberlin AH-10690	**CRITICAL**	Customer generated $7,888.29 over 12 orders, but has been inactive for 410 days (last order: 2016-11-15).	Verify if account contact has changed; review recent support tickets; launch re-activation offer.
Becky Martin BM-11140	**CRITICAL**	Customer generated $11,789.63 over 4 orders, but has been inactive for 307 days (last order: 2017-02-26).	Verify if account contact has changed; review recent support tickets; launch re-activation offer.
Bill Shonely BS-11365	**CRITICAL**	Customer generated $10,501.65 over 5 orders, but has been inactive for 558 days (last order: 2016-06-20).	Verify if account contact has changed; review recent support tickets; launch re-activation offer.
Brian Stugart BS-11665	**CRITICAL**	Customer generated $3,288.11 over 3 orders, but has been inactive for 582 days (last order: 2016-05-27).	Verify if account contact has changed; review recent support tickets; launch re-activation offer.

4. Model Governance, Limitations & Disclaimers

Causal & Uplift Disclaimer: LTV figures represent statistical conditional expectations learned by gradient-boosted decision trees over historical purchasing sequences. They do not claim absolute causal certainty. True incremental ROI and elasticity must be validated through champion/challenger holdout groups.

Prediction Uncertainty: Due to inherent stochasticity in re-order intervals, predictions are presented with 80% empirical cross-validation prediction intervals. Feature drift is continuously monitored via Population Stability Index (PSI).
